## 2008 Trek Mountain Bikes

**Fuel EX**

9

The definitive all-day, all-conditions trail bike, with 120mm of rear wheel travel.

**Remedy**

19

When the mountain trails get sleeper, faster and rockier, the Remedy is ready with 150mm of rear wheel travel.

**69er**

25

29" front wheel and 26" rear, in singlespeed, hardtail and full suspension.

**Top Fuel Race**

31

Cross country fully-suspended race bikes—efficient and light, with 90mm of rear wheel travel.

**Elite Race**

37

Cross country OCLV Carbon performance in the lightest possible package.

**Hardtail**

39

Alpha Aluminum cross country hardtails—ready for any trail adventure.

**Cyclocross**

51

Pure-bred cyclocross racing bikes.

**Gravity**

55

From the 10"-travel Session downhill bike to the hardtail, dirt-jumping Jack.

**WSD**

61

The most complete line of women's specific mountain bikes available.

ABP places the rear pivot concentric to the rear axle.

## Suspend Conventional Thought

### Suspension Intelligence

For 2008, Trek has integrated a completely new line of technology on its Remedy and Fuel EX full suspension bikes. This technology is known as R1i.

R1i builds on the previous R1 system (rocker link, single pivot) by adding key feature technologies. From the superior braking characteristics of the patent-pending ABP, to the fully tuned Full Floater floating shock mount, to the category-leading stiffness enhancing technologies of EVO Link and E2 tapered head tube—these key technologies allow every bike equipped with R1i to offer more control in every trail condition.

### ABP™ (Active Braking Pivot) - Why Skid?

Conventional designs place the rear suspension pivot either below or above the axle. Trek's new Active Braking Pivot (ABP) is a patent-pending technology that puts the rear suspension pivot concentric to the rear wheel axle. This new pivot location results in a bike with the most active suspension under braking.

**Reduces Braking Forces on Suspension** Braking forces cause most suspension systems to stiffen (commonly known as brake jack). When suspension stiffens, the rear wheel is not able to fully track bumps, resulting in wheel hop, increased skidding and decreased control.

Trek's new Active Braking Pivot (ABP) places the rear pivot concentric to the rear axle, which reduces the effect of braking on the suspension system. In fact, ABP creates the most active suspension under braking. Since ABP keeps suspension active, your shock doesn't "pack up" under high-frequency bumps, allowing your wheel to track every bump. The result—reduced skidding, more control, and better, more effective braking.

**Perfect Suspension Balance, Front-to-Rear** Since ABP allows the rear suspension to work efficiently in both braking and non-braking situations, the front and rear shocks can work together all the time. This harmony creates a perfect balance of suspension front-to-rear and adds up to better handling and more control in all situations.

## It's Not More Travel - It's Smarter Travel

### Full Floater™

Trek's highly successful R1 suspension system allowed our suspension designers to dial-in the rear suspension's leverage ratio (the amount a shock is compressed as a function of wheel travel) while maintaining a rigid, durable frame and swingarm structure.

The R1i system takes a huge step forward with the all-new Full Floater rear shock mounting technology.

### Shock Floats on Two Moving Linkages

Fixed mount suspension designs attach the shock to one top moving link while the bottom mount is fixed to the frame. Full Floater technology connects the rear shock mounts to two moving linkages—the EVO Link on the top, and the extension of the swingarm at the bottom. The trajectory of these two attachment points adds a degree of freedom to the shock mounting system and creates a more complex leverage ratio, one that is optimized for use with an air shock.

The new system performs in a way its predecessors were not capable, providing a configuration that is active over the small stuff with good control of the mid stroke, and precise end-stroke compression.

## Taking Stiffness To New Levels

### E2 Tapered Steerer

Faster descents necessitate longer travel and a stiffer front-end to handle the bigger hits and rougher terrain. To meet the demands of these conditions, Trek introduces E2, a tapered steerer tube and head tube system that uses a larger, stronger, and stiffer 1 1/2" lower diameter steerer that transitions to a standard 1 1/8" upper. By increasing the diameter of the lower steerer tube and head tube, E2 better distributes the loads and stresses encountered in all-mountain riding. By working closely with suspension manufacturers like Fox Racing Shox and RockShox, the benefits of this design don't stop at the frame—E2 is built right into the fork design itself.

**1 1/8" Isn't Enough** Aggressive riders learned a long time ago that longer travel bikes require stiffness unavailable from standard 1 1/8" head tubes. While downhill-style double crown forks offer superior stiffness, they come with a weight penalty and a reduced turning radius.

**1 1/2" Is Too Much** With 1 1/2" head tubes, the steerer tube is rigidly supported at both ends by the headset (with a good distance between the two bearings)—there's virtually no value to having a large diameter steerer tube for its entire length. The larger steerer tube adds weight higher up on the bike that's noticeable when throwing the bike from one turn to another.

**E2 Is Just Right** By placing a larger diameter steerer tube at the bottom and a smaller diameter tube at the top, frames equipped with E2 offer higher strength and stiffness values not achievable with other single crown designs. E2 also offers a superior turning radius over a double clamp fork, which facilitates tight switchbacks that are so common in all-mountain riding.

### EVO Link™

No matter how stiff a full suspension frame's front or rear triangle might be, the complete bike can only be as stiff as the connection that joins the two. The evolution of Trek's Rocker Link design involves going beyond the three-piece plate and bolt-style rocker. The EVO Link is a one-piece forged design that is lighter, stiffer, and more compact.

### Fuel EX

The all-new Fuel EX—redefining the capabilities of the trail bike, offering the comfort, versatility and control trail riders demand for all-day, all-conditions riding. With the most active suspension system under high speed braking, optimized for use with the custom-tuned Fox air shock, the Fuel EX may truly be the ultimate trail bike.

### 69er

Why ride 69? Because a 29" front wheel gives rollover and cornering abilities that every mountain biker can appreciate. Yet, the 26" rear wheel keeps the wheelbase tight, giving a quick and maneuverable ride that's beneficial on every trail. 69er—it's trail bike confident, race bike fast, and it's how Travis Brown rolls.

## 69er Single Speed™

**FRAME** Alpha Red Aluminum w/externally and internally relieved head tube, hydroformed bi-basal down tube and top tube, wishbone seat stay, hydroformed chainstays, asymmetric seat tube, forged horizontally adjustable disc dropouts

**FRONT SUSPENSION** Maverick Custom Double crown, 100mm

**WHEELS** Bontrager Race X Lite Single Speed, 29" front, 26" rear

**CRANK** Bontrager Race Lite Single Speed, 32T

**REAR DERAILLEUR** n/a

**SIZES** 17.5, 19.5, 21.5"

**COLOR** Matte Root Beer

Frame available in 15.5, 17.5, 19.5, 21.5" sizes.

## Top Fuel 69er™

**FRAME** Alpha Red Aluminum w/hydroformed top tube, bi-axial down tube, R1 Race Tuned Suspension, pivotless rear swingarm, Hi/Lo chainstays, oversized sealed bearings, 90mm rear wheel travel

**FRONT SUSPENSION** Fox F29 100RL w/air pressure, rebound, lockout, alloy steerer, 100mm, 51mm offset

**REAR SUSPENSION** Fox Float RP2 w/Pro Pedal, rebound, custom tuned

**WHEELS** Bontrager Race; 29" front, 26" rear

**CRANK** Shimano Deore LX 44/32/22

### Race

The members of the Trek/VW racing team demand the lightest weight possible with the most efficient platform. Ridden proudly by XC legends Chris Eatough, Jeremiah Bishop and Sue Haywood, the Top Fuel has rocket-fast, competition-crushing race performance with 90mm of rear wheel travel, based on the proven R1 suspension platform.

## Top Fuel 9.9 SSL™

**FRAME** OCLV Red Carbon w/R1 Race Tuned Suspension, pivotless rear swingarm, Hi/Low chainstays, oversized sealed bearings, 90mm rear wheel travel

**FRONT SUSPENSION** RockShox Reba World Cup w/positive and negative air pressure, Motion Control, floodgate, compression, rebound, remote lockout, carbon crown and steerer, 100mm

**REAR SUSPENSION** Fox Float RP23 w/3 position tunable Pro Pedal, custom tuned

**WHEELS** Bontrager Race X Lite

### Cyclocross

Cyclocross racers know that when the cow bells are ringing, nothing matters more than the bike's performance. That's why the XO is outfitted with a light and stiff Alpha Aluminum frame, cantilever brakes and plenty of mud clearance—all the right design elements to get you over the barriers and to the finish first.

### WSD

Trek Women's Specific Design (WSD) bikes feature a special frame geometry modified to complement a woman's anatomy. This balanced riding position eliminates lower back pain and reduces neck and shoulder stress, giving female cyclists more comfort, power, and control—key for cornering and maneuvering tight singletrack.

#### Trek Limited Lifetime Warranty

Trek Bicycle Corporation provides each original retail purchaser of the bicycle a lifetime warranty against defects in materials and workmanship in the bicycle frame and rigid fork when purchased from an authorized Trek dealer. Trek Bicycle Corporation likewise warrants all original parts on the bicycle, excluding suspension forks and rear shock absorbers, for a period of one year from the date of purchase. Suspension forks and rear shock absorbers shall be covered by the stated warranty of their original manufacturers. Paint and decals are warranted for one year. This warranty is expressly limited to the repair or replacement of a defective frame, fork, or defective part and is the sole remedy of the warranty. This warranty applies only to the original owner and is not transferable. Claims under this warranty must be made through an authorized Trek dealer. Proof of purchase is required. A warranty registration card must be completed and received by the Trek Bicycle Corporation before a warranty claim may be processed. This warranty covers bicycles and components outside the United States only if purchased through an authorized international Trek distributor or Trek dealer within the country of purchase. The warranty does not cover normal wear and tear, improper assembly or follow-up maintenance, installation of parts or accessories not originally intended or compatible with the bicycle as sold, damage or failure due to accident, misuse or neglect, or modification of the frame, fork or components.

Trek Bicycle Corporation shall not be responsible for incidental or consequential damages. Some states do not allow the exclusion of incidental or consequential damages, so the above exclusion may not apply to you. This warranty gives the consumer specific legal rights, and those rights may vary from place to place. This warranty does not affect the statutory rights of the consumer.

All photos, illustrations, colors, weights, and specifications contained in this catalog are based on the latest production information at the time of publication. Trek reserves the right to make changes at any time, without notice, in colors, materials, equipment, specifications and models. Any variations in colors shown may be due to the reproductive variations of the printing process. Photos may include non-U.S. equipment. Some models may be shown with optional equipment. Off road bike weights based on medium or 18 inch frame size. Road bike weights based on 56cm frame size.

All Trek bikes are sold exclusively through our network of Authorized Dealers who we entrust with professional assembly and service of your bicycle. Trek extends a Lifetime Warranty on every frame.

WE PRINT OUR CATALOGS ON ONLY FOREST STEWARDSHIP COUNCIL (FSC) CERTIFIED PAPER

FSC certification ensures that the paper in our catalogs contains fiber from well-managed and responsibly harvested forests. The goal is to shift the market to eliminate habitat destruction, water pollution, and displacement of indigenous peoples. This catalog meets FSC's strict environmental standards.
