Long before racing bikes became vogue, Trek was at work perfecting them. Rather than rest upon the laurels of tradition, Trek took bold strides toward innovation. The results being that each racing season, more and more Treks are crossing the finish-line ahead of the pack (including

TREK RACING BICYCLES. AN EXAMPLE OF INNOVATION THE COMPETITION WILL ONCE AGAIN HAVE TO FOLLOW.

Rebecca Twigg at the 1984 Olympic Games.
This year, Trek has continued its custom-framebuilding heritage by creating a series of lean and hard racing machines dedicated to just one thing — blazing speed and response.
But for 1985 every Trek racing bike, from the easily-affordable 460 to the outrageously-expensive
170, will be crafted using advanced Trek-inspired investment castings. This exotic method of construction not only assures perfect alignment and finish, it results in greater critical strength and stiffness in the headtube, seat-lug, and bottom bracket.

Of course, it would be unwise to marry such costly technology with an uninspired choice of componentry. So each Trek features a hand-picked selection of equipment groups designed to enhance the short-wheelbase frame's singular purpose. Components like a high-strength cold-forged crankset sculpted to cheat the wind, sensitive short-reach brakes, and lightning-fast heat-treated wheels.

The Trek Racing bicycles.

See them standing still at a Trek dealer now. Or try to catch them at the next race.
A true racing machine in every regard — but without the high-speed price tag. The 23.7-pound 460 starts with T-1™ chrome-moly tubing (with Trek investment-cast fittings, of course) built into a short-wheelbase geometry to maximize handling and performance. Then we equip it with a group of precision aero components suited to the triathlete or entry-level racer, including SunTour's last-shifting New Cyclone S derailleurs and fast-stopping Dia-Compe GS 400 brakes.

Trek dropouts with internal cable routed to SunTour derailleurs.

The bike that launched the careers of thousands of U.S.C.F. racers and triathletes last year. The heart of the 560 is a close-coupled frame built with a combination of Reynolds 501 chrome-moly in the main triangle, and stiffer T-1™ chrome-moly in the rear. Then it's equipped with a complete Sun Tour Cyclone group, including a new cold-forged 52/42 crankset and sealed bottom bracket. With extra-light Rigida 700C wheels and high-pressure clinchers, the 23.4-pound 560 is all ready for the starter's gun.

Cleats lock securely into SunTour's N-Cyclone racing pedal.
660

At its price, no other racing bike will be able to match this Trek-built Reynolds 531 frame and innovative Italian component systems. Like Olmeca's offset crankset and incredibly light composite Mistral derailleurs. Modolo black-anodized "Speedy" short-reach brakes. And Panaracer's new dual-hardness Tri-Sport tires mounted on Matrix Titan wheels tensioned with DT stainless spokes. A ton of performance at 22.2 pounds.

Tall 53-tooth chaining is standard on the 660's Olmeca crankset.

670

New for this year, the 22.7-pound 670 brings together a classic Trek-built racing frame with equally classic component designs. From Campagnolo, there's a high-torqueing New Record drivetrain. From Modolo, a set of grey-anodized Equipe brakes. From Sun Tour, the racer's favorite New Winner 6-cog freewheel. And from Matrix, a pair of ultra-light rims, fitted with new Tri-sport tires vulcanized from two different rubber formulations to maximize speed and traction.

Stiff, responsive Modolo Equipe brakes with sintered pads.
A 20.7-pound bicycle with Victory written all over it – Campagnolo Victory, that is. To a tight-geometry investment-cast Reynolds 531 racing frame, we’ve added Campy’s newest performance gruppo. Featuring an aerodynamic cold-forged crankset for serious racing.

A stiff short-reach brakeset with recessed-bolt design for sensitive control. And Wolber NeoPro 260-gram tires glued to Matrix Iso tubular wheels for the kind of response you need to bridge a fast-moving break.

A racing bike in the American custom-built tradition, combining revolutionary Trek investment-cast frame technology with the most honored racing gruppo in cycling history. For 1985, Campagnolo’s Super Record Pro components include a 53/42 crankset for a 112-inch time-trial gear, a pair of ultralight Matrix Iso 32-hole aerodynamic rims, and a hot-pink polyurethane finish that makes this 19.9-pound machine look blazing fast even when it’s standing still.

Closer-tolerance investment-cast lugs join Reynolds 531 tubing.

### RACING SPECIFICATIONS

#### 460

- **FRAME**: Main Tubes: True Temper Chromoly Double Butted Fork: Tange Mangalloy w/CCL Crown
- **Mounts**: Chain Hanger
- **Forks**: Trek Pro Bik.
- **Headset**: Trek Pro Bik.
- **Brakes**: Dia Compe QS400N Blk w/Recess and Hooded Aero Levers
- **Rims**: Rigidas 13-20 700C Alloy Blk. Anodized
- **Seat Post**: SR 55-E Laprade Type Forged Alloy
- **Saddle**: San Marco Lazer Leather
- **Extras**: SR Airo Toe Clips w/Lapize Straps

#### 560

- **FRAME**: Main Tubes: Reynolds 501 Cromaloy Double Butted Fork: Tange Mangalloy, CCL Crown w/Recess
- **Mounts**: Chain Hanger Shift Lever Bosses
- **Forks**: Trek Pro Bik.
- **Headset**: Trek One-Piece Cast
- **Brakes**: SunTour N-Cycloone Forged Alloy 52/42
- **Rims**: Rigidas 13-20 700C Alloy Blk. Anodized
- **Seat Post**: Sugino SP-92 Forged Alloy
- **Saddle**: San Marco Lazer Leather
- **Extras**: Lapize Toe Clips & Straps, Alloy Water Bottle Cage w/Bottle

#### 660

- **FRAME**: Main Tubes: Reynolds 531CS Double Butted Fork: Reynolds 531CS w/Aero Crown
- **Mounts**: Chain Hanger Shift Lever Bosses
- **Forks**: Trek Pro Bik.
- **Headset**: Trek One-Piece Cast
- **Brakes**: SunTour N-Cycloone Forged Alloy 52/42
- **Rims**: Rigidas 13-20 700C Alloy Blk. Anodized
- **Seat Post**: Sugino SP-92 Forged Alloy
- **Saddle**: San Marco Lazer Leather
- **Extras**: Lapize Toe Clips & Straps, Alloy Water Bottle Cage w/Bottle

#### 670

- **FRAME**: Main Tubes: Reynolds 531CS Double Butted Fork: Reynolds 531CS w/Aero Crown Stays: Reynolds 531CS
- **Mounts**: Chain Hanger Shift Lever Bosses
- **Forks**: Trek Pro Bik.
- **Headset**: Trek One-Piece Cast
- **Brakes**: SunTour N-Cycloone Forged Alloy 52/42
- **Rims**: Rigidas 13-20 700C Alloy Blk. Anodized

Seat Post: Campagnolo Super Record
Forged Alloy
Saddle: San Marco Concor
Extras: Campagnolo Toe Clips w/Binda
Super Straps, Alloy Water Bottle Cage & Bottle, Wolber Tubular Cement

Trek bicycles consist of component parts and materials made by Trek or purchased from sources around the world. Changes in customer demand or availability occasionally necessitate temporary or permanent substitution of parts specified. If substitution is made, the new parts will be of comparable or superior quality and performance to those originally specified. Every Trek bicycle is equipped with safety reflectors required by federal law. All specifications are subject to change without notice.
