400

Trek's lightweight sport bike features an advanced T-1™ double-butted chrome-moly frame with investment-cast frame components, a crankset that can easily be modified to bring the CRC 12-speed drivetrain up to 18 speeds, and a pair of Rigidheat-treated aluminum wheels. The heat-treating process increases rim hardness, resulting in a superior strength-to-weight ratio and quicker response.

Advanced investment-cast lugs are Trek's own design.

410

New for 1985, the 410 combines an innovative Trek-built sport-performance frame with the foremost name in bicycle componentry, Campagnolo of Italy. Campy's new Triomphe drivetrain gruppo includes a cold-forged 52/40 crankset, fast and accurate "Corsa" derailleur, and friction-control shift levers—all with that famous Campagnolo "feel." The perfect combination for the fast recreational rider or triathlete.

The efficient 410 drivetrain: Campagnolo's newest Triomphe.
A Sport Touring bicycle designed for fast day tripping, weekend jaunts, or commuting. In harmony with the responsive Trek-built frame is a Maillard Helicomatic 700SH freewheel, featuring special-profile teeth for smoother shifts. Shimano's Z-Series derailleurs, with brass bushings for quick action to help you shift all 15 speeds with ease. Blackburn's sturdy anodized rack bolted onto the rear braze-ons. And a comfortable anatomically-designed saddle.

Shimano Z-series derailleurs for precise shifts over all 15 speeds.

After crafting this Reynolds 501 frame with investment-castings, it was only fitting it be equipped with the most advanced components Japan has to offer. Like SR's AXC-100 aerodynamic crankset, SunTour's New Cyclone derailleurs with matched freewheel, and Dia-Compe's superlative Royal Compe 400 short-reach brakes. The performance of this ultra lightweight sport bike even reaches right down to the hubs - the Sansin Gyromasters have precision-ground low-friction races, as well as an attractive mirror-like finish.

Precision Royal Compe 400 silver brakes with hooded levers.
A sport bicycle of classic proportions. A superior Trek-bilt Reynolds frame is equipped with a complete Campagnolo gruppo. The new Campy Triomphe design features clean aerodynamic styling with traditionally superior performance. Add plenty of efficient braze-ons like shift-lever bosses, double bottle mounts, and head-tube pump peg and you’ve got American innovation with an Italian accent.

Investment-cast bottom-bracket with low-friction cable routing.

Sport Touring at its highest level, matching our unparalleled investment-cast frame technology with equipment that’s just as precise. Like the Shimano N600 group, featuring cold-forged triple cranks mated to a sealed bottom-bracket that repels water and grit. A Maillard Helicomatic 700 Series quick-change freewheel. And to top off this machine, there’s an anatomically designed saddle to maximize your touring comfort.

Helicomatic hub/free-wheel allows quick changes in seconds.
Trek’s top-of-the-line Sport Performance machine, the model 600 builds on an investment-cast frame featuring Reynolds renowned 531 CS double-butted tubing. Then it’s complemented with a precision grey-anodized Shimano N600 component group. A color-coordinated Concor saddle. And a pair of Matrix Titan rims and Gyromaster hubs that have been laced with DT stainless spokes, then pre-stressed for lightweight dependability.

Tek bicycles consist of component parts and materials made by Tek or purchased from sources around the world. Changes in customer demand or availability occasionally necessitate temporary or permanent substitution of parts specified. If substitution is made, the new parts will be of comparable or superior quality and performance to those originally specified. Every Tek bicycle is equipped with safety reflectors required by federal law. All specifications are subject to change without notice.
